### **【Title of the invention】**

### **FUEL PUMP UNIT**

### **【CLAIM 1】**

A fuel pump unit disposed in a container having a bottom mounted to a bottom portion of a fuel tank, comprising:

a sub-container protruding in a central direction of the fuel tank outside of the container;

a fuel storing space located in the sub-container at a center of the bottom portion of the fuel tank; and

a fuel passage wall surrounding half of the fuel storing space, apart therefrom, and opening a fuel inlet to the bottom portion of the fuel tank,

wherein the inlet of the fuel pump, or an inhale tube connecting a surrounding thereof, penetrates through a surrounding wall of the container having the bottom to the fuel storing space, and

a jet pump unit spouts the fuel in the inhale tube to the container having the bottom.
